Creating an account on the ICRAF Dataverse

Go to www.worldagroforestry.org/dataverse and create an account. Once you have created an account, send your username to Jacquie Muliro j.muliro@cgiar.org or Paul Baraka p.baraka@cgiar.org for activation. Your account will be activated and either Jacquie or Paul will notify you.

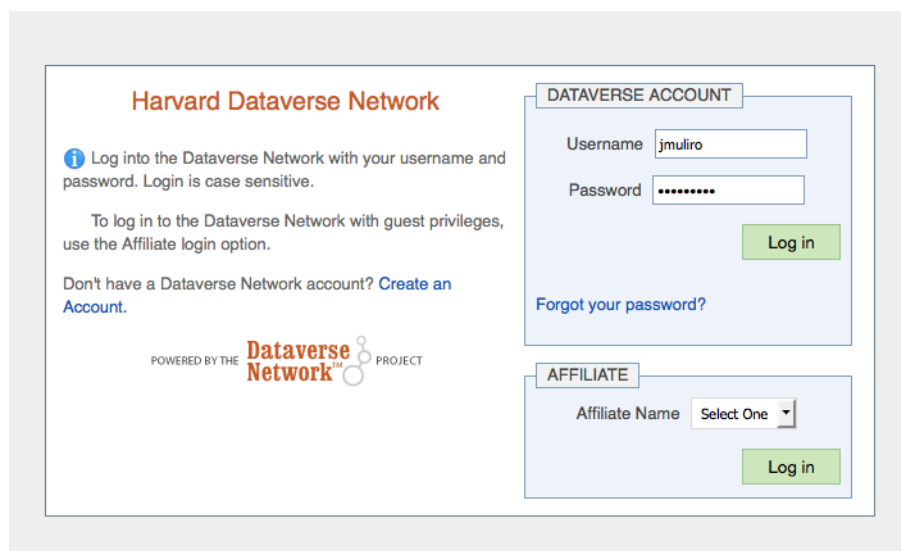

The screenshot shows the ICRAF Dataverse website. At the top left is the World Agroforestry Centre logo. A navigation bar includes links for 'About us', 'Publications', 'Careers', 'Learning', 'Contact Us', and 'Intranet'. Below this is a secondary navigation bar with 'Home', 'Our Research', 'Where We Work', 'Our Products', and 'News'. The main header area features the 'Harvard Dataverse Network >' logo and a search bar. A red box highlights the search bar and the 'Create Account' and 'Log In' buttons. The main content area displays 'ICRAF - Data Collection (All)' with a search bar and a 'Search' button. Below the search bar, there are sorting options (Global ID) and statistics (Studies: 275 | Downloads: 9195). A list of studies is shown, with the first entry being 'ICRAF's carbon footprint 2013' by Audrey Chenevoy, including a description and a 'Log In' button.

Figure 1

Logging in

Once your account has been activated, log in to the [ICRAF Dataverse](http://www.worldagroforestry.org/dataverse) you will now be able to create studies and upload data.

The screenshot shows the Harvard Dataverse Network login page. The page is titled 'Harvard Dataverse Network' and includes instructions for logging in. It features two login options: 'DATAVERSE ACCOUNT' and 'AFFILIATE'. The 'DATAVERSE ACCOUNT' section has fields for 'Username' (jmuliro) and 'Password' (masked with dots), a 'Log in' button, and a 'Forgot your password?' link. The 'AFFILIATE' section has a dropdown menu for 'Affiliate Name' (Set to 'Select One') and a 'Log in' button. The Harvard Dataverse Network logo is also visible.

Figure 2

Creating a new study

To create a new study, click on the option icon (gear like icon) on the top right corner as highlighted on figure 3.

Figure 3

As an ICRAF Dataverse contributor, you should be redirected to the page below. You should click on the create study + Upload data page. Click on the tab and proceed.

Figure 4

Dataverse network study creation terms of use

You are required to read the terms of use. Once you have read and understood the terms, click on I agree on terms and continue.

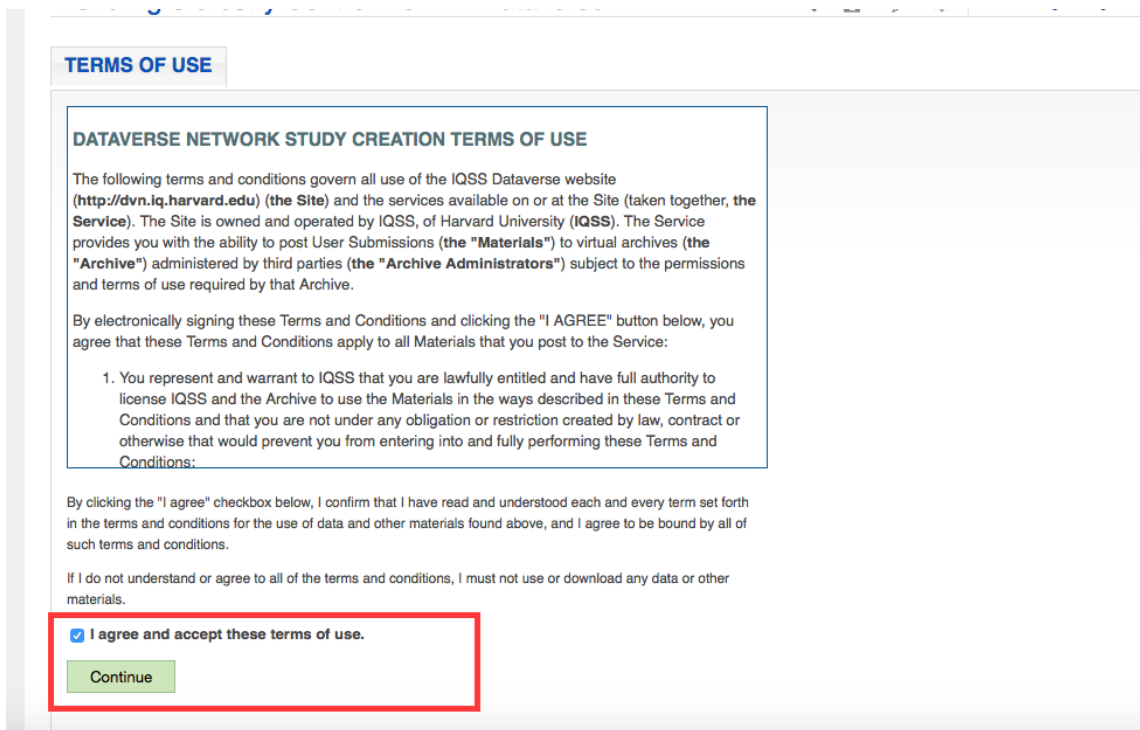

Figure 5

Creating a study and adding Metadata data.

Here, you will be asked to enter information describing the data that you are about to upload.

You are encouraged to enter as much Metadata as possible but only the study title is required to get started.

You can add and edit the Metadata at any time.

We recommend that you at least add the following Metadata fields.

- a) Title of study
- b) Other ID – please put in which **Science Domain** you belong to here
- c) Related publication (if any)
- d) Name(s) of people who were the primary collectors / contributors of the data and their affiliations
- e) A short abstract of what the study is about (if a related publication exists)
- f) Keywords
- g) Country (ies) where the data was collected

Save Cancel

Figure 8

After you are done, click on the save button and proceed to uploading data.

Figure 9

After you have saved, a “study version note” box will appear as shown in the figure below. You are required to put in a small comment describing what you have done for example “added meta data”, “change authors” etc.

Figure 10

Uploading data

To upload data, click on the add files link as shown on figure 11.

POWERED BY THE **Dataverse Network** PROJECT v. 3.6.2

Paul Mwangi Log Out

FARMER MANAGED NATURAL REGENERATION PROJECT: BASELINE SURVEY

doi:10.7910/DVN/29938

DRAFT Study Version: 2 – View Released Version

Created: Wed Apr 08 02:17:26 EDT 2015 – Last Updated: Wed Apr 08 02:17:26 EDT 2015

- Edit Cataloging Information
- Delete Draft Version
- Edit/Delete File + Information
- Add File(s)
- Edit Study Version Notes
- Submit For Review

Figure 11

Browse to the file and select open. It will automatically appear in the upload files table as shown in figure 12

To simplify display, especially with large studies, categorize your files (for instance, "Questionnaire" or "Data File"). Each study has its own categories, so when you upload a file, simply type the name of the category you'd like to create in the lefthand box, then select save.

If you have previously created a category, select it from the drop down menu, then select the file or files you'd like to place in that category.

You can always edit categories and edit or delete files later by selecting the appropriate action from the top left hand corner of the study page as shown in the figure below.

UPLOAD FILES

Select the Data Type from the drop-down list. Then click the *Browse* to select the file to add to this study.

SPSS (.sav or .por), STATA (.dta), CSV (character-separated values), TAB (tab-delimited), or GraphML (.xml) files are processed as subsettingtable data files, which can be analyzed online by using the Dataverse Network analysis tools. When selecting a CSV (character-separated values) data type, an SPSS Control Card file is first required.

You can use the file *Category* to define and group the types of file that you upload, such as Documentation or Data files.

After you have selected the file(s) that you would like to add to the study, click *Save*.

Choose a Data Type

- Choose a Data Type
- Tabular Data
 - SPSS/POR
 - SPSS/SAV
 - Stata
 - RData
 - CSV (w/SPSS card)
 - TAB (w/DDI)
 - SPSS/POR,(w/labels)
- Network Data
 - GraphML
 - Zip Archive (Multiple Files)
 - Tar Archive (Multiple Files)
 - FITS file
 - Other

Tabular and Network Data files can be subset and analyzed using the Dataverse Network analysis tools. These files will take longer to upload and you'll get a notification once the upload is completed. Tabular files will also get Universal Numerical Fingerprint (UNF). All other files types will be available for download only.

File Name	Description	Size (bytes)	Remove
-----------	-------------	--------------	--------

Save Cancel

Figure 12

Use the check boxes next to the file name to download multiple files. Data files will be downloaded in their default format. You can also download all the files in a category by checking the box next to the category name. You will be prompted to save a single archive file. Study files that have restricted access will not be downloaded.

STUDY V. 1 v. 3.6.2
Paul Mwangi Log Out

- Edit Cataloging Information
- Edit/Delete File + Information
- Add File(s)
- Edit Study Version Notes
- Submit For Review
- Delete Draft Version

Figure 15

You will receive an email confirmation that your study has been submitted for review.

Figure 16

The Dataverse administrators will do the following before releasing your study:

- a) Add an ICRAF disclaimer
- b) Anonymize the data
- c) Ensure the data submitted is raw cleaned data.
- d) Add anything that is missing in the cataloging information
- e) Set the permissions (if need be)

Releasing the study

Once the Dataverse administrators are satisfied with the study, the study will be released. Once again, you shall receive an email confirmation with a link to the study.

Figure 18

Permissions

For project data that hasn't been published, the data is usually restricted. Dataverse administrators will restrict the files to only project members.

We also have studies that have restricted datasets and access can be given upon request.

Deaccession of a study

You can at any time request a released study from being accessed by anybody. This can be done sending an email to the Dataverse administrators with your reason for deaccession.

This makes the study totally inaccessible to all users and the public. Please note that the study is not permanently deleted and you and the Dataverse administrator can access it by selecting to view deaccessioned studies.

To permanently delete a study please contact the Dataverse administrators.
